Buttons
Oh no!

How easy are buttons?

If you have no accessibility needs, a standard button is pretty easy. Just a simple read and a click and you're on your way!

How about if you're visually impaired? What about if you have a motor skills disability? What if you've broken your mouse or touchpad? What if your cat is sat on your keyboard AGAIN?!

We design our buttons with these users in mind.

Accessibility (A11y)

Temporary

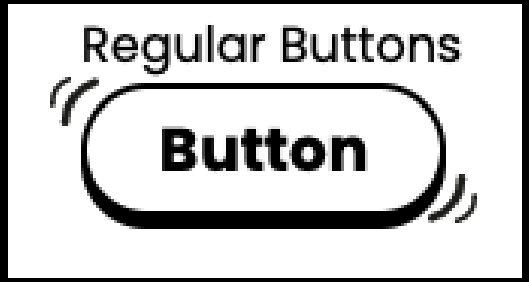

- Broken limb
- Broken mouse or equipment
- Distractions (children, pets, partners)
- Screen glare
- Slow internet
- Under the influence

Permanent

- Cognitive impairments
- Blindness
- Quadriplegia
- Deafness
- Motor Skill Impairment (tremors)

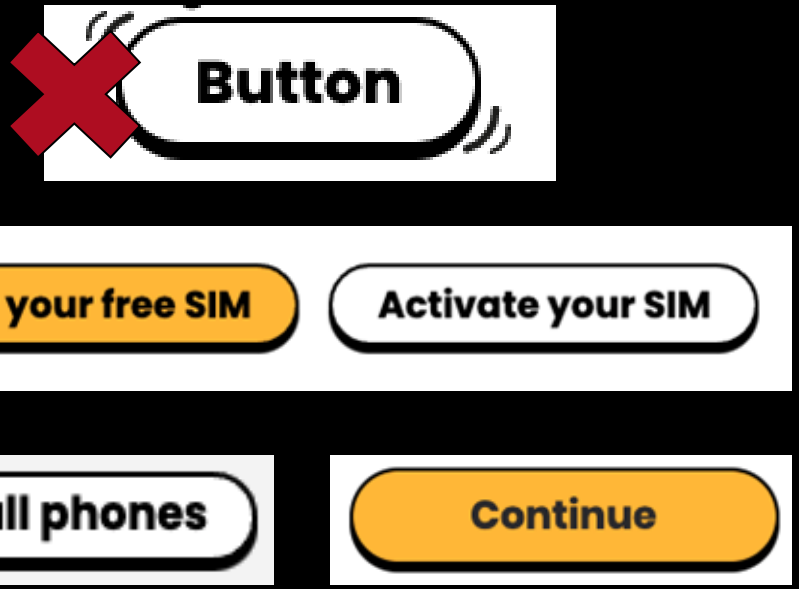

Basic Buttons

- Button content
- Aria-labelledby
- Aria-label & icons
- Tap target size - 48px x 48px
- <button> vs. <a>
- :focus and :hover
- :before and :after

Button Content

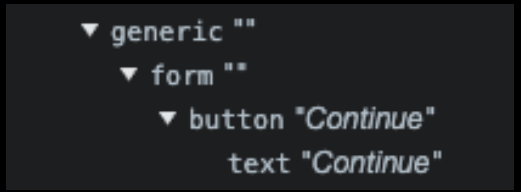

- **Button content**
- Aria-labelledby
- Aria-label & icons
- Tap target size - 48px x 48px
- <button> vs. <a>
- :focus and :hover
- :before and :after

Aria-labelledby

- Button content
- **Aria-labelledby**
- Aria-label & icons
- Tap target size
- <button> vs. <a>
- :focus and :hover
- :before and :after

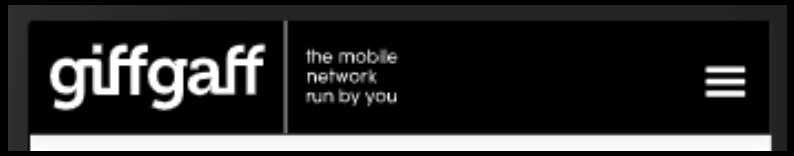

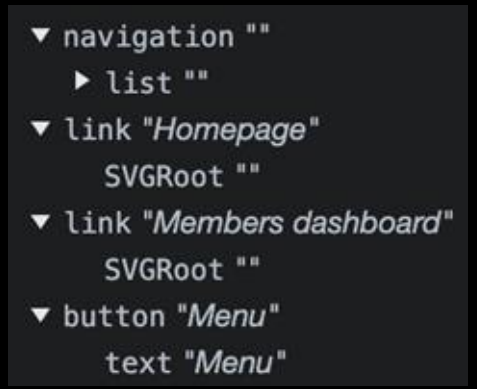

```
<button class="gg-c-btn">
  <span id="continue-btn" class="gg-u-screen-reader-only">Continue with your purchase</span>
  <span class="gg-c-btn__switch" aria-hidden="true" aria-labelledby="continue-btn">Continue</span>
</button>
```

Aria-label

- Button content
- Aria-labelledby
- **Aria-label & icons**
- Tap target size
- <button> vs. <a>
- :focus and :hover
- :before and :after

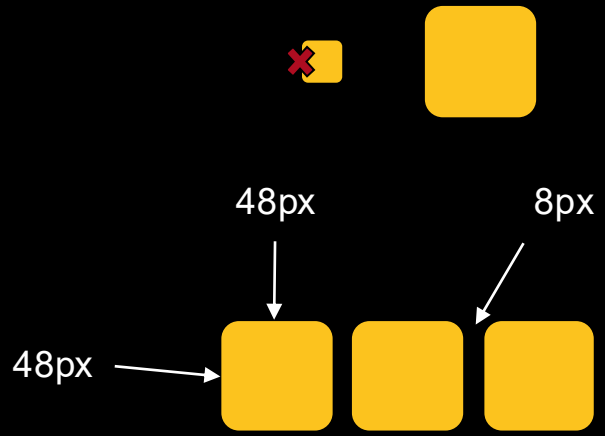

```
<button class="gg-c-btn" aria-label="menu icon">
  <span class="gg-c-btn__switch" aria-hidden="true"><svg></svg></span>
</button>
```

Tap-target size

- Button content
- Aria-labelledby
- Aria-label & icons
- **Tap target size**
- <button> vs. <a>
- :focus and :hover
- :before and :after

<button> vs. <a>

- Button content
- Aria-labelledby
- Aria-label & icons
- Tap target size
- **<button> vs. <a>**
- :focus and :hover
- :before and :after

:focus & :hover

- Button content
- Aria-labelledby
- Aria-label & icons
- Tap target size
- <button> vs. <a>
- **:focus and :hover**
- :before and :after

```
@include focus-hover;
```

:focus & :hover

- Button content
- Aria-labelledby
- Aria-label & icons
- Tap target size
- <button> vs. <a>
- **:focus and :hover**
- :before and :after

```
@include focus-hover;
```

```
@mixin focus-hover() {
  &:focus,
  &:hover,
  &:active {
    outline: solid 2px getColour(light-blue);
    outline-offset: 0;
  }
}
```

:before & :after

- Button content
- Aria-labelledby
- Aria-label & icons
- Tap target size
- <button> vs. <a>
- :focus and :hover
- **:before and :after**

```
<button class="gg-c-btn" aria-label="Button"> flex
  ::before
  <span class="gg-c-btn__switch" aria-hidden="true"> flex
    ::before
    "Button"
    ::after == $0
  </span>
</button>
```

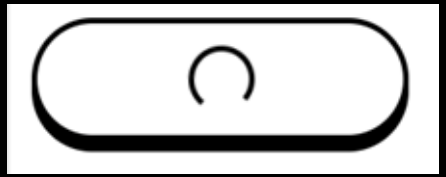

```
.gg-c-btn__switch:after,
.gg-c-btn__switch:before {
  background-size: 100%;
  content: "";
  display: block;
  height: 16px;
  opacity: 0;
  position: absolute;
  width: 16px;
}
```
